Construction Contractor Technical Experience GEORGE J SHAW CONSTRUCTION

George J Shaw Construction performed the mass excavation and rock removal for both sites. The parking garage featured rock removal, backfill with flowable fill, and a green roof that featured block insulation. The building featured clay, gravel, and special amended soils for backfill.

George J Shaw was able to overcome several logistical problems because of this project's location which is a very busy and high profile district in the City of Kansas City, MO.

Examining the numbers:

Rock, Shale, Clay Excavation	210,000 CUYD
Haul Off	370,000 CUYD
Flowable Fill	7,800 CUYD
Insulation/Foam Fill	350,000 CUFT
Drains	3,890 LNFT
Amended Soils	7,600 CUYD
